

Geography of Science in Europe: Boston Studies in the Philosophy and History of Science

Edited by Robert E. Kohler

This volume examines the geography of science in Europe, focusing on the following questions: How has the distribution of scientific activity and scientific institutions changed over time? What are the factors that have shaped this distribution? What are the implications of these changes for the future of science in Europe?

Travels of Learning: A Geography of Science in Europe (Boston Studies in the Philosophy and History of Science Book 233)

★★★★☆ 4.3 out of 5

Language : English

File size : 4712 KB

Text-to-Speech : Enabled

Screen Reader : Supported

Print length : 380 pages

The book is divided into three parts. The first part provides an overview of the history of science in Europe, from the Renaissance to the present day. The second part examines the current state of science in Europe, with a focus on the distribution of scientific activity and scientific institutions. The

third part considers the implications of these changes for the future of science in Europe.

This book is essential reading for anyone interested in the history, philosophy, or geography of science. It is also a valuable resource for policymakers and other decision-makers who are concerned with the future of science in Europe.
