- The game is played between two players or two teams of two players.
- The objective of the game is to pocket all of your balls before your opponent pockets all of theirs.
- Players take turns shooting at the balls.
- A player can only shoot at a ball that is in the same group as their own balls.
- A player must pocket a ball in Free Download to continue shooting.

- If a player fails to pocket a ball, their turn is over.
- The game ends when one player has pocketed all of their balls.

There are a number of different variations of pool that are played in the BCA Pool League. The most common variation is 8-ball pool.

8-Ball Pool

8-ball pool is a popular variation of pool that is played with a set of 16 balls. The balls are divided into two groups: the solids (balls 1-7) and the stripes (balls 9-15). The 8-ball is black and it is not assigned to either group.

The objective of 8-ball pool is to pocket all of your balls before your opponent pockets all of theirs. You can only shoot at a ball that is in the same group as your own balls.

Once you have pocketed all of your balls, you must pocket the 8-ball to win the game. The 8-ball must be pocketed on a clean shot. If you foul while pocketing the 8-ball, your opponent wins the game.
