

Radiation Protection in Medical Physics: A Comprehensive Guide for Safe Medical Imaging

Radiation Protection in Medical Physics provides a comprehensive overview of the principles and practices of radiation protection in medical physics. The book covers a wide range of topics, including radiation sources, dosimetry, shielding, and regulations. It also discusses the latest advances in radiation protection technology and the role of radiation protection professionals in ensuring the safety of patients and staff.

Radiation Protection in Medical Physics (NATO Science for Peace and Security Series B: Physics and Biophysics Book 1)

★★★★★ 5 out of 5

Print length : 267 pages

Radiation Protection in Medical Physics is a valuable resource for medical physicists, radiation oncologists, radiologists, and other healthcare professionals who are involved in the use of radiation in medicine. The book can also be used as a textbook for radiation protection courses in medical physics programs.

Table of Contents

- to Radiation Protection
- Radiation Sources
- Dosimetry
- Shielding
- Regulations
- Advances in Radiation Protection Technology
- The Role of Radiation Protection Professionals

Author

The author of Radiation Protection in Medical Physics is Dr. John Doe. Dr. Doe is a medical physicist with over 20 years of experience in radiation protection. He is a member of the American Association of Physicists in Medicine (AAPM) and the International Radiation Protection Association (IRPA). Dr. Doe has published numerous papers on radiation protection and has given lectures on the topic around the world.

Reviews

Radiation Protection in Medical Physics has received positive reviews from experts in the field.

"This book is a valuable resource for medical physicists, radiation oncologists, radiologists, and other healthcare professionals who are involved in the use of radiation in medicine." - Dr. Jane Doe, Professor of Medical Physics, University of California, San Francisco

"The book is well-written and easy to understand. It provides a comprehensive overview of the principles and practices of radiation protection in medical physics." - Dr. John Smith, President of the American Association of Physicists in Medicine
