## **The Life of George Mallory**

George Mallory was born in Cheshire, England, in 1886. He was a brilliant student and athlete, and he developed a passion for mountaineering at a young age. In 1909, he made his first ascent of Mont Blanc, the highest mountain in the Alps.

Mallory quickly became one of the leading mountaineers of his generation. He made several attempts to climb Mount Everest, and in 1924, he led the first British expedition to the summit. The expedition reached an altitude of 8,225 meters, but Mallory and his climbing partner, Andrew Irvine, disappeared during their final attempt to reach the summit.

## **The Search for Mallory's Body**

For decades, Mallory's body remained lost on Everest. However, in 1999, a team of climbers led by Conrad Anker set out to find Mallory's body and uncover the secrets of his final ascent.

The discovery of Mallory's body helped to shed light on the mystery of his final ascent. The team was able to determine that Mallory and Irvine had reached an altitude of at least 8,600 meters, which is higher than any other climber had reached at that time.

However, the team was not able to determine whether Mallory and Irvine had reached the summit of Everest. The last photo taken by Mallory shows him and Irvine climbing towards the summit, but it is not clear whether they reached the top.
